

PROCESS SAFETY

DIGITAL DIALOG

Sterile Reprocessing Expert Training for the safe and economical reprocessing of Aesculap products: HOT TOPICS IN REPROCESSING

Webinar

In these times it becomes more and more important to find new ways to exchange experiences, best practices and new developments in reprocessing between practitioners, scientists and suppliers.

As conventional ways have become difficult these days, we are developing new formats. The advantage of Digital Dialog is, that we can have more frequent sessions with participants from various countries easily.

GOAL

Exchange information and best practices among colleagues, discuss hot topic with experts from various professions, keep our knowledge up to date and address new requirements with collaborative excellence

LEARNING OBJECTIVES

- Safe and efficient reprocessing of Aesculap products
- Optimized value preservation of Aesculap instruments
- Hygienic Safety in Reprocessing
- Organization in a CSSD
- Optimized Process Design

TARGET GROUP

Sterile Managers, shift leaders and experts, Alumni of Aesculap Academy Sterile Expert Courses
